## Google Apps to Use on Your Phone

You're likely already using Google Calendar, Google Maps and the beloved Gmail inbox. Komando.com rounded up a few Google apps that you may not be using but should be. Check out the list below.

**Google Tasks** is perfect for professionals and freelancers, but it's also fantastic for busy people who need a place to document all the random stuff they have to do, including errands, housework, things for the kids, and more.

**Google Lens** is a camera app amped up with several investigative features. You can "Google" any object,

sign, or label you see in the wild and even instantly translate text into another language.

**Google Arts & Culture** gives you the chance to enjoy museums and exhibitions from the comfort of your home and is great for students.

**PhotoScan by Google Photos** allows you to optimize your favorite memories by scanning them in and cleaning them up by cropping, red-eye detection, glare control and even perspective correction.

Komando.com is a great resource for all things tech including streaming, social media, gadgets, and security.
